

Lake Okeechobee Bathymetry

Source (downloaded October 2018):

- **NOAA:** <https://maps.ngdc.noaa.gov/viewers/wcs-client/>
- **USGS:** <https://sofia.usgs.gov/publications/maps/lakeokeebathy/>

- Bathymetry from USGS was assigned to model inside Lake Boundary polygon. Coordinates are NAD83 and vertical datum NAVD88.
- Bathymetry from NOAA was assigned to the model outside the Lake Boundary polygon.
- USGS bathymetry minus NOAA bathymetry data equals approximately 3.9 m. So before assigning bathymetry to the model, it required adding 3.9 m to the NOAA bathymetry.
